Akutime - AI-Powered Nurse Timesheet Management App

1. Executive Summary

Product Name: Akutime

Version: 1.0

Date: August 2025

Team: Healthcare Technology Division

Akutime is a mobile-first timesheet management application designed specifically for healthcare workers, with initial focus on nursing staff. The app leverages AI-powered photo capture technology to digitize paper timesheets and streamlines the approval workflow between nurses and their supervisors.

Key Value Proposition: Transform tedious manual timesheet entry into a seamless, AI-assisted mobile experience that reduces administrative burden while maintaining compliance and accuracy.

2. Product Overview

2.1 Problem Statement

Healthcare workers, particularly nurses, face significant administrative overhead managing paper-based timesheets. Current pain points include:

- Time-consuming manual data entry from paper forms
- Risk of transcription errors
- Delayed approval workflows
- Poor visibility into timesheet status
- Difficulty tracking historical records
- Manual signature collection processes

2.2 Solution
